

Person 2 — Edge Builder

Task

- Read `trains_index.json`
- For **each train**, look at its station list
- Create edges between **consecutive stations**

Example from one train:

Rajapur Road → Vaibhavwadi Rd

Vaibhavwadi Rd → Kankavali

Kankavali → Sindhudurg

...

Edge structure (example)

from: "Rajapur Road"

to: "Vaibhavwadi Rd"

train_no: "10101"

weight: distance_difference

This is where the **graph is born**.
